

RUSSIA OVER HAY'S NOTE

Thought Plan to Hamper Military Movements.

ENGLAND AND GERMANY ACT

King Edward Signs Declaration of Neutrality, and Germany Has Signi- fied Informally Its Approval.

ST. PETERSBURG, Feb. 11.—Secretary Hay's note to the powers calling upon them to unite with the United States in presenting a request to the combatants in the Far East to restrict the war area to the disturbed countries themselves, has caused some irritation in official circles here. It is believed that the circular is designed to hamper Russia's future movements. It is thought, however, that the note will not be effective, inasmuch as assurances have already been received of Germany's benevolent neutrality, in accordance with a secret agreement between the Czar and Emperor William at Darmstadt.

Again France is bound to aid Russia in all possible ways, short of armed intervention. These two countries, at least, it is considered, will not indorse the communication.

King Edward Signs.
LONDON, Feb. 11.—King Edward today signed the declaration of neutrality in the Far East, at a meeting of the privy council.

State Department Silent.
The State Department is still silent concerning the nature of the reply received to the note sent to neutral powers asking them to co-operate in a movement to limit the theater of war in the East and preserve the neutrality of China. Many answers are known to have been received, and representatives of the more important countries have conferred with Secretary Hay concerning the movement.

An unusual number of foreign representatives called at the State Department today. The British ambassador, the Russian ambassador, Minister Takahira, Count di Celler, the Italian charge d'affaires, the Korean minister, Baron Ishikawa, counselor of the Austro-Hungarian embassy, Minister Calvo, and several other members of the Diplomatic Corps called on Secretary Hay.

Germany Has Signified Informally Its Approval of the plan of limiting the zone of military operations.
Prepared by Mr. Hay.

The proclamation of neutrality, which is to be issued by the United States, was prepared by Secretary Hay and submitted by him to the President. He, in turn, submitted it to the Secretary of War and the Attorney General. The latter is still considering the proclamation, and it is not known exactly when it will be returned to the President for his signature.

Japan Approves Plan.
It is known that Japan approves the plan sent by Secretary Hay asking that the zone of war be restricted and that armaments be made necessary. China remains neutral. No official announcement to this effect, however, has yet been made. Mr. Takahira, the Japanese minister, was among the callers at the State Department this morning and had a conference with Secretary Hay.

WELL TOLD
Doctor Explains Feeding Without Medicine.

"It is a well substantiated fact," says a Maine physician, "that a very large percentage of the cases of infant mortality are due to errors in diet, causing indigestion and the myriad affections following it. It is the duty of the mother, I believe, who has the child, to keep it as healthy as possible. The loss of flesh from whatever immediate cause is due primarily to nutritional disturbances involving defective assimilation. With these I wish to relate briefly a case of mine (not the only one by any means), in which I have been successful in connecting link between disease and health."

"It was a case of chronic gastritis where the patient had seen the rounds of much stereotyped treatment and where there was much depression caused by long persistence of distress at the stomach—pain, gas, and burning soon after eating—monotony."

FEATURES AND FACTORS IN THE WAR SITUATION

News From Many Points That Brings Out the Significance of Events and Makes the Story Complete.

The result of the naval battles so far fought has tended to give Japan the mastery of the water at the seat of war, and that in forty-eight hours. It is doubtful if the remainder of the Russian fleet at Port Arthur will dare leave the protection of the forts, and re-enforcement from Vladivostok, where there are four armored cruisers, is impracticable.

Fifty thousand Russian troops are reported to be already assembled along the line of the Siberian railroad and the Yalu, in Manchuria, to oppose the Japanese advance in that country.

The Tientsin correspondent of the "London Standard" says that the Russians have massacred a hundred Chinese at Liao-Yung, in Manchuria, and that in consequence the Chinese officials are much alarmed.

A dispatch from Seoul says that the Korean Emperor has taken refuge at the French legation in that city.

Two large Russian steamers and four Russian whalers have been captured and taken into Japanese ports.

FROM THE RUSSIAN STANDPOINT.
Mixed emotions hold sway in St. Petersburg. False reports of victories followed by admissions of defeat have much excited the people. There is strong enthusiasm for war, the most striking evidence of which was given at the naval academy yesterday when the Czar personally advanced the senior class to the rank of officers.

The mobilization of the army reserves in eastern Asia has begun. The report that Russia is negotiating for a loan of \$200,000,000 with a foreign syndicate is denied, and it is claimed that the Russian resources are ample without recourse to any loan.

The Russians put great confidence in the military ability of General Kouropatkin, the minister of war, and look to the army to redeem the nation from naval defeat and to win eventual victory in the war.

JAPAN SHOWS NO EMOTION.
The tranquillity which prevails in Japan in spite of the victories, surprises foreigners. No crowds are in the street and there is no cheering or other demonstration. The people act as though they take these things for granted.

While Russia is understood to acquiesce in the proposal to limit the field of war operations to Korea and Manchuria, Japan is reported to be unwilling to agree. Japan wants to be able to throw troops against the enemy from any available seaport.

PROPOSAL TO RESTRICT OPERATIONS.
Japan expects to occupy Seoul with a large force at once, ready to meet the Russians when they come up. She also is planning to land troops near the mouth of the Yalu, and take the Russians in the rear. Important engagements are expected to occur within a week.

Germany finds Secretary Hay's proposition to limit the war area acceptable, but in France it is meeting opposition.

FLEET ACTION EXPECTED.
Baron Hayashi, the Japanese minister in London, looks for an important fleet action at Port Arthur shortly. Though the Russian fleet is protected by the forts, he expects the Japanese ships, by going to the Chinese side, can, by high angle fire, drop shells that will damage the Russian fleet.

EVENTS IN THIS COUNTRY.
The New York Japanese are to meet tomorrow afternoon to raise \$5,000,000, which the Japanese merchants have pledged themselves to send to the home government. The greater part of this amount goes as a war loan, but part is a gift and part for the Red Cross Society.

Rush orders for commissary supplies for the Japanese have been placed in Cincinnati.

A heavy shipment of ambulances destined for Japan left Indiana this week.

Prices of food stuffs in Chicago have jumped in the belief that Russia will check shipment from her fields on account of the war, thus eliminating one of America's largest competitors out of the market.

OPINIONS OF EXPERTS.
Comment by experts on the development of the war up to this time includes:

Capt. A. T. Mahan—The present engagements off Port Arthur do not settle anything. Neither side, in the light of my present information, has been sufficiently damaged to venture the statement that it has been weakened.

Rear Admiral Francis T. Bowles—The engagement at Port Arthur proves conclusively the usefulness of the torpedo boats.

Major Tasker H. Bliss—Unless the Japanese can sweep the Russian fleet from the sea, or at least render it inefficient, it will be impossible for them to land troops in Korea or Manchuria or furnish those they now have there with supplies.

The Russians are rushing troops to the Yalu River, and have been for some time, according to reports. It is no doubt the Japanese program to drive the Russians back and get to the railroad, and the Yalu region is expected to be the scene of the first land conflict. If the Japanese are unable to dislodge the Russians there, it is difficult to see how they can win.

Capt. W. W. Kimball—It is my opinion that the Japanese torpedo flotilla can utterly annihilate the Russian fleet in a very short course of time. The Japanese are probably the best torpedo-boat men in the world.

**ASSOCIATED CHARITIES
DENOUNCE PROMOTERS**
Society Warns Local Organizations
Against Entertainers Who Use Name
as Cloak to Make Money.

The Board of Managers of the Associated Charities is through with professional promoters who come here and pretend to aid local charities that they may make many more their own private fortunes, and the board put it on record at its last monthly meeting, when it claimed that to raise money by such methods is to get it almost by false representation.

The scheme of some of the professional promoters is to come to some local charity and give it perhaps a hundred dollars for the use of its name and then advertise an entertainment largely in the name of the organization and finally walk away with six, seven, or eight hundred dollars in profits.

As a result of the discussion at yesterday's meeting the secretary will send a letter to every charity in the District setting forth the facts and urging all to refrain from further dealing with the professional entertainers.

An interesting letter was read which showed the gratification of Henry Phillips, the Philadelphia millionaire, at the progress made in the fight against tuberculosis in Maryland in the District. Mr. Phillips recently donated to the Associated Charities the sum of \$1,000. The Churches' League of America, expressed through Edward F. Looker, its secretary, its commendation of the work of the association. He paid special attention to the efforts of the member to remove the unsanitary conditions so productive of an increasing death rate.

The report of the finances of the month shows receipts amounting to \$324. The Associated Charities received 2,148 applications for assistance the month of January, representing 1,192 families. Material aid was administered 1,449 times in the month, most of this aid coming from the month's receipts. The relief which represents the general relief funds of the two co-operating societies, in 23 instances relief was secured from other sources than the Citizens' Relief Association.

Those present at the meeting were: Prof. B. T. Janney, chairman; Frederic L. Moore, George S. Wilson, Dr. George M. K. Jones, J. W. Babson, Col. Archibald Hopkins, Thomas W. Smith, and Mr. Charles F. Weller.

**GOVERNMENT LOOKING
AFTER ITS BUILDINGS**
Immediate steps will be taken by the Treasury Department to rebuild the treasurer's office at Baltimore. This building was destroyed by fire, a part of the walls being left standing.

An engineer has been sent over to Baltimore from the office of the Supervising Architect to determine whether any part of the old walls can be utilized in the new building, and also whether the walls of the new house will have to be torn entirely down.

Vast Russian Forces Guard City of Harbin

Center of Czar's Settlement and Point Where
Railroads Converge—Japanese Will Find
Difficulty in Taking Stronghold.

Harbin, the Manchurian city toward which Japanese troops are now reported to be moving, is the busiest center in Manchuria, and the heart of the Russian settlement in the Far East.

James W. Davidson, who has been named United States consul at Antung, visited Harbin and all other cities in Manchuria a few months ago. Mr. Davidson, who will return to Manchuria in a few days, describes Harbin as a busy city of 100,000 population.

It is the one city that any power which desires to control Manchuria must hold. The Vladivostok and Port Arthur railroads meet there, and are merged into the single line of road which leads across Manchuria and Siberia into Russia. Harbin is the center of the Manchurian wheat district, and has many large flouring mills. It is within easy reach by rail of the cattle country in northern China, in which much beef is now raised for the Russian army.

The Manchurian Railway, which is controlled by the Russian government, is now building engine works in Harbin at a cost of more than \$1,000,000. A hotel, which is to cost \$200,000, is also building, and the government has many other improvements under way.

Harbin reminds one of a Western boom city, said Mr. Davidson. "It has developed so rapidly that houses cannot be built for the new comers, and many of them are living in temporary shacks and tents. It is unlike boom cities in our mining country, however, in that it has many handsome buildings, and shows that it will some day be a substantial city."

Eighty trains a day pass through Harbin. It is all life and business. All traffic must pass through this city, and the great distributing point for Manchuria, and all other towns in the country are quiet in comparison with Harbin.

Russia is said to have massed its military strength along the Vladivostok and Port Arthur lines, and to have permitted to enter Harbin without defeating a Russian force so large that the Japanese would find it difficult to take.

BUILD NATIONAL HOME FOR AGED NEGROES

To build a memorial national home for aged and infirm negro people, a bill has been introduced in the Senate by Mr. Hoar and referred to the Committee on Military Affairs.

It is intended by the bill to employ \$200,000 of arrears of pay and bounty which are due the estates of deceased negro soldiers who served in the late civil war, and which amounts were in the hands of the commissioner of the freedmen's bureau, and have been repaid into the Treasury.

The building or buildings for the home are to be erected in the District of Columbia upon land owned or to be owned by the association.

WILL YOU HELP A SICK FRIEND?

GET MY BOOK FOR HIM NOW

Which shall I send?
Book 1 on Dyspepsia.
Book 2 on the Heart.
Book 3 on the Kidneys.
Book 4 for Women.
Book 5 for Men (sealed).
Book 6 on Rheumatism.

Send me no money. Only tell me which book to send. You certainly know of some one who is sick—some sufferer who will be grateful for the help I can offer.

And that book tells of a way to help. Tells of a way so certain that I, as a physician, offer it to the public. The book is the result of 20 years in hospitals and at bedside. I searched for a way to cure deep-seated and difficult diseases. I tried every remedy known to medicine. I tried every prescription. How by scientific experiment I traced out the causes that bring on chronic diseases.

This was a revelation. Then my real success began. I found invariably that where there was a weakness, the inside nerves were weak. Where there was a lack of vitality that the vital nerves lacked power. Where weak organs were found I always found weak nerves. Not the nerves commonly thought of, but the vital organs' nerves, the nerves of the invisible nerves.
